Singapore-Listed Hong Leong Asia Clinches Contracts for Sochi Winter Olympics More Than 10,000 Engines Operating in Russia

Singapore, 18 February 2014 – **China Yuchai International Limited** (NYSE: CYD) ("China Yuchai" or the "Company"), announced today that engines from the Company's main operating subsidiary, Guangxi Yuchai Machinery Company Limited ("GYMCL"), were used in various applications to build the infrastructure for the Sochi Winter Olympic Games which is currently underway.

Pavers and loaders using GYMCL engines were used to pave roads and in the construction of the stadiums and heavy-duty trucks propelled by GYMCL engines provided the necessary transportation for the movement of goods and materials. The ability of GYMCL's engines to operate in extreme weather and in less than optimal conditions such as in alpine areas and tunnel building applications, made them the engine of choice.

GYMCL's engines were also used to support the 2013 Summer Universiade, officially known as the XXVII Summer Universiade, which was held in the city of Kazan, Russia in July 2013. This event which was organized by the International University Sports Federation and by the authorities of the Republic of Tatarstan, featured over 10,400 university athletes from 162 countries as well as various cultural events.

Hoh Weng Ming, President of China Yuchai, commented, "Over 10,000 GYMCL engines are currently operating across Russia and this is a testimony of the high quality and good performance of our engines and our service capabilities. We provide a wide range of different engines to service the various needs and requirements of different organizations across the vast Russian territories and we look forward to the continued growth of our presence in Russia."

While tropical Singapore has not sent a team to the Winter Olympics, it is with pride that a Singapore-owned company has clinched contracts to work on the infrastructure and be part of this important global sporting event.

About China Yuchai International

China Yuchai International Limited, through its subsidiary, Guangxi Yuchai Machinery Company Limited ("GYMCL"), engages in the manufacture, assembly, and sale of a wide array of light-duty, medium-duty and heavy-duty diesel engines for construction equipment, trucks, buses and cars in China. GYMCL also produces diesel power generators, which are primarily used in the construction and mining industries. In 2012, GYMCL sold 431,350 diesel engines and is recognized as a leading manufacturer and distributor of diesel engines in China. For more information, please visit <http://www.cyilimited.com>

China Yuchai International Limited, listed on the New York Stock Exchange, is a subsidiary of Hong Leong Asia. Both companies are members of Hong Leong Group Singapore.
